Scripting & Automation: Bash | Python | System Administration Automation

Security & Maintenance: Security Patching | Application Updates | System Maintenance | Cybersecurity Fundamentals

Development & Tools: Git/GitHub | Jenkins | JavaScript | Node.js | PHP | Drupal | MySQL | Microsoft 365

PROFESSIONAL EXPERIENCE

TRINITY SOLAR, **Cheshire, CT**
Applications/Permitting Specialist — Oct 2025 – present

- Prepare, review, and submit permit, utility, and state application packages while ensuring accuracy, completeness, and compliance with municipal requirements.
- Monitor application status and maintain detailed records within internal databases, ensuring timely updates throughout the permitting process.
- Coordinate with municipalities, utility companies, and internal departments to resolve application issues and facilitate timely approvals.
- Review, organize, and manage high volumes of documentation and correspondence while maintaining exceptional attention to detail.
- Utilize Microsoft Office Suite, Adobe Acrobat, and internal business systems to process documentation, track workflows, and support cross-functional teams.
- Prioritize multiple projects in a fast-paced, deadline-driven environment while consistently meeting processing deadlines and quality standards.

ZENSOURCE, Farmington, CT May 2022 – Aug 2024
Full-Stack Web Developer

- Developed responsive, client-facing websites with optimized performance and accessibility compliance
- Created new framework components to support scalability and reduce development time
- Built and maintained internal technical documentation site for staff and external stakeholders
- Conducted regular security updates, critical patching, and Drupal version upgrades
- Designed and prototyped interactive web elements in Figma to improve client engagement

DATAHOIST, Austin, TX Mar 2018 – Feb 2019
Frontend Developer, Contractor

- Built and maintained client-facing and internal web applications using React, Next.js, SQL, and Azure
- Authored user documentation for clients and internal staff
- Applied consistent coding standards to ensure maintainability and performance
- Collaborated with a multidisciplinary team to design future development strategies

OTIS ELEVATOR COMPANY, Farmington, CT Oct 2010 – Apr 2022
Third Party Work Order Specialist (2016–2022)
OtisLine Elite Specialist (2011–2016)
Customer Service Representative (2010–2011)

- Used Otis Elite software to remotely inspect elevator operating modes, explain system status to customers, guide troubleshooting based on observed conditions, and escalate issues to field technicians when necessary.
- Provided remote technical troubleshooting and support to customers and field technicians across multiple elevator manufacturers.
- Configured and programmed elevator communication systems and helped investigate reported technical issues.
- Documented service issues, maintained work-order records, and coordinated with field technicians and local offices to support issue resolution.
- Managed strategic-account work orders, tracked outstanding items, and supported contract compliance and invoicing.
